Virtualization

VMWare: Workstation

VirtualBox

Databases

SQL Server, Oracle, MySQL

OS

UNIX (Linux, AIX, OSX)

Windows Server (2003 and 2008)

Miscelánea

Selenium, Jmeter

Hudson, Sonar

Maven, Artifactory

Scripting (UNIX and Powershell)

Apache Tomcat, Weblogic, Jetty

VBA, Python, PHP

Experience

Java Software Developer

Argonet Comunicaciones S.L.

02/2012-today

I currently develop an internal web solution for Ministry of Defence. Project is a Web application that allows CRUD of complex tasks and also of its single elements.

Developed is based on JSF2, EJB, JPA and SOAP web services through Test Driven Development.

Responsible for implementing migration from a legacy technology to Java, frontend and backend. In a team of four deciding best practices around JSF2. In all area leading Test Driven Development.

Tools used Eclipse, SqlDeveloper, Maven, Hudson, Sonar.

Ruby Software Developer

Intec Consultancy Solutions Ltd

03/2013-08/2013

Project is a Web application to manage videos that is aimed to be a platform to upload videos, similar to youtube.

Develop is based on Backbone, Coffescript and Ruby on Rails.. Integration with Facebook, Twitter and Amazon Web Services and Nimbb.

Responsible for implementing migration from a Knockout technology to Backbone in the frontend and refactoring Backend to reduce it to a nutshell composed of API REST Services.

Tools used VirtuaBox, Vim, AWS EC2, S3 and OpsWork.

Java Software Developer

SoftwareAG Spain

11/2010-02/2012

Project was a Web Application for savings banks to provide capital grant to associations in a national scope. Application will manage this process: capital solicitation, steps until acceptance and track of process itself.

Developed in a BPM, ESB and WS oriented framework.

Responsible for implementing required features, frontend and backend.

Tools used Eclipse, VmWare, SqlDeveloper, Ant.

Java Software Developer

SoftwareAG Spain

09/2008-11/2010

Project was a Web Application for savings banks in a national scope to manage personal loans and mortgages. Application will manage this process: loan or mortgages solicitation, steps until acceptance and track of process itself.

Developed in a BPM, ESB and WS oriented framework.

Responsible for implementing required features, frontend and backend.
