FRANCISCO LÓPEZ-SANCHO

SENIOR DEVELOPER
Specialized in Java and Scala

franciscolopezsancho@gmail.com
Tel. 07918187043

Profile

Certified Java Software developer

Skills

Development	Testing	Architecture & design
Currently developing backend using Scala and Java	Ample experience in Testing Driven Development and BDD	Experience in Development of Software OO and Functional Programming with Design Patterns in a SDLC environment

---

Technical Knowledge

Development	Virtualization	Miscelánea
Core Java	VMWare,VirtualBox,Vagrant	Selenium,Jmeter
Scala, Akka	**Databases**	Hudson,Sonar
Spring, JPA, JSF	Oracle, MySql, MongoDB	Maven,Artifactory
Junit, Mockito, ScalaTest	**OS**	Scripting in Linux
SOA, Web Services	UNIX (Linux , AIX, OSX)	Apache Tomcat, Weblogic, Jetty
R, Matlab	**IT Ops**	VBA, Python
Elasticsearch,Kibana,Logstash	Chef,Puppet	Joomla
Spark		
Js: Backbone,Angular,Knockout		
Ruby on Rails		
AWS: EC2,S3,Glacier,Elastic Transcoder,OpsWork		
Subversion,Git		

Experience

Java/Scala Software Engineer
IFPI   12/2013-today

I currently develop multiple solutions to help legal music commerce all around the world. Processing Data, building APIs as REST Web Services are some of the projects developed, some others involve Machine Learning and some Data Analisis with R. Almost every single solution works in a High Performance environment, 24/7. There's been many small projects in the last year and some quite big. One of those big projects processes social interactions (Twitter,Facebook,Tumblr...) in order to find whether they had ilegal content. It was the signature project in 2014 and I did most of it, from backend to frontend.
Develop is based on Java, Scala, Akka, Spring, JPA through Test Driven Development. This tools query SQL and NoSQL Databases, MongoDB to be exact
The core team is eight people. I'm in charge of introducing new technologies to the rest of the group and give support to two juniors
Tools used Eclipse, SqlDeveloper, Maven, Hudson, Command Line, Amazon Web Services

Java Software Developer
Argonet Comunicaciones S.L.   02/2012-11/2013

Project was an internal web solution for the Ministry of Defence. Project is a Web application that allows CRUD of complex tasks and also of its single elements.
Develop is based on JSF2, Spring, JPA and SOAP web services through Test Driven Development.
Responsible for implementing migration from a legacy technology to Java, frontend and backend. In a team of four deciding best practices around JSF2. In all area leading Testing Driven Development.
Tools used Eclipse, SqlDeveloper, Maven, Hudson, Sonar.

Java Software Developer

SoftwareAG Spain

09/2008-02/2012

Project 1 - 11/2010-02/2012

It was a Web Application for savings banks to provide capital grant to associations in a national scope. Application will manage this process: capital solicitation, steps until acceptance and track of the process itself.
Developed in a BPM, ESB and WS oriented framework.
Responsible for implementing required features, frontend and backend.
Tools used Eclipse, VmWare, SqlDeveloper, Ant.

Project 2 - 09/2008-11/2010

It was a Web Application for savings banks in a national scope to manage personal loans and mortgages. Application will manage this process: loan or mortgages solicitation, steps until acceptance and track of the process itself.
Developed in a BPM, ESB and WS oriented framework.
Responsible for implementing required features, frontend and backend.
Tools used Eclipse, VmWare, SqlDeveloper, Ant.

Ruby Software Developer

Intec. New Technologies consulting

06/2007-06/2008

Project was a Web Application aimed to support Entrepreneurs in her bussiness development under "Plan Avanza 2007" of Spanish Government. Application was designed as a table game. Each step will develop skills mostly through a little bit of theory and some question.
Developed using MySql, Ruby on Rails and an Apache Server.
Responsible for implementing required features, frontend and backend.
Tools used TextMate, MySqlWorkbench.

Microsoft Office Trainer

Different companies

2000-2007

Training Microsoft Office to different clients as NATO or Airbus

Other Projects
(after 9 to 5 job)

Ruby Software Developer

Intec Consultancy Solutions Ltd

03/2013-08/2013

Project is a Web application to manage videos that is aimed to be a platform to upload videos, similar to youtube.
Develop is based on Backbone, Coffescript and Ruby on Rails.. Integration with Facebook,Twitter and Amazon Web Services and Nimbb.
Responsible for implementing migration from a Knockout technology to Backbone in the frontend and refactoring Backend to reduce it to a nutshell composed of API REST Services.
Tools used VirtuaBox,Vim, AWS EC2, S3 and OpsWork.

Education

ORACLE CERTIFIED PROFESSIONAL
Java SE 6 Programmer
UNED (2011-2014)
Philosophy
Coursera (Jan 2015 - currently)
Data Science Specialization

Languages
